

BACHELOR OF ARTS EXAMINATION, 2019

(2nd Year, 4th Semester, Old)

SOCIOLOGY

RESEARCH ORIENTATION AND STATISTICS IN SOCIOLOGY - II

PAPER – 4.1 (OLD)

Time : Two hours

Full Marks : 30

Answer to each module should be written in a separate script

MODULE -I

Answer **question no.1** and any one from the remaining questions

1. Write a short note on anyone of the following : $5 \times 1 = 5$
 - a) Define statistics and its importance in Social science.
 - b) Levels of measurement with suitable examples.
2. Define Histogram and write its features. Construct a histogram for the following date : $10 \times 1 = 10$
3, 5, 8, 11, 13, 19, 23, 22, 25, 3, 10, 21, 14, 9, 12, 17, 22, 23, 14
3. What is an ‘Ogive’? In which level of measurement is ‘Ogive’ applied? Construct an Ogive for the following date. $10 \times 1 = 10$

MODULE-II

- a) Define Measures of Dispersion. Briefly describe the properties of Standard Deviation and Variance.
- b) Describe Biivariate Association with special reference to Correlation (person's r).
- c) The height of the players (in centimetres) from a basketball team are represented by the table.

Calculate the standard Deviation and interpret the results.

(10)

6. An examinee has scored 79 in first semester Statistics test.

The mean score of the class is 80 and the standard deviation 5.6. The student is eager to know her percentile rank. Which statistical method should she apply to know that?
